MILKIES MILK-SAVER REVIEW

by Whitney [Leave a Comment](#)

The following is a guest review from Trista at [Anderson's Angels](#).

Are you a breastfeeding mother or do you know someone who is planning on breastfeeding? If so then I have a wonderful, can't think of how I lived without it, product I want to tell you about. If you are like any other breastfeeding mother then you dread losing any of your milk. Most of us refer to it as "liquid gold." I know that I hate losing any of my milk and I was looking for a way to save the milk I was losing while nursing Angel. I finally found the perfect product – a Milkies Milk-Saver that not only saves my milk but is also comfortable to use!

The Milk-Saver is easy to use. Just simply slip it into your bra on the non-nursing side before you begin nursing. The Milk-Saver will collect the milk that is leaked when your breast milk lets down. You can then store this milk and save it for any time you may need it. The Milk-Saver is slim and portable and the patented Milk-Saver allows you to breastfeed anywhere without the fear of embarrassing leaks or uncomfortable nursing pads.

I love that no one ever knows I'm wearing it. Also thanks to its stylish, durable case I can keep my Milk-Saver safe and clean at all times, as well as be able to take it with me anywhere. Like most mothers, this company cares very much about the safety of the products being used while breastfeeding. That is why the Milk-Saver has been rigorously tested to ensure that there are zero chemicals leaching and that it contains no BPA or phthalates. I loved my Milk-Saver so much that I went and bought my cousin one for her baby shower and would highly recommend it to any woman who is currently breastfeeding or is planning on it. You can purchase your very own Milkies Milk-Saver on [Fairhaven Health's](#) website and they are currently on sale as well!
