Milkies Freeze

Where was this 11 years ago when I had my daughter?

The Milkies Freeze has made storing breastmilk so much easier. And it fits perfectly in the corner of my freezer. There is a flat piece of metal on top where you lay the storage bag. It evenly distributes the breastmilk so the bag is flat. Once frozen, you place the storage bag in the plastic compartment.

I'm not sure how many bags I have stored, but it holds quite a few bags. I have about 10 days worth of breastmilk stored. I plan to store enough breastmilk to have on hand once my son goes past a year old, and I have to say that the Milkies Freeze will make it very convenient to do so.

On a scale of 1-10, how likely am I to recommend this product? 10+
